BLACK HISTORY MONTH

Black History Month will be celebrated during the month of February. The theme of this year's observance is "Creating and Defining the African American Community: Family, Church, Politics, Culture."

Commemorative events will be conducted throughout USAREUR to mark this observance. The HQ USAREUR/7A Equal Opportunity Office Website at <https://www.per.hqusareur.army.mil/services/equal/specialobservances/bhm2001/bhm2001main.htm> provides information on these events. Leaders should refer to USAREUR Pamphlet 600-21 and encourage participation in these events within mission constraints.

FIELDING, UPGRADING, AND REPLACING AUTOMATED INFORMATION SYSTEMS

USAREUR is concerned that program managers (PMs) are fielding new automated information systems (AISs) and upgrading or replacing legacy AISs without first evaluating the effects the AISs will have on the command, control, communications, computers, and intelligence (C4I) infrastructure, including the wide area network (WAN). This degrades the performance of the newly fielded or upgraded AIS; it also affects the overall performance of the USAREUR network and other AISs using the network.

In September 2000, PMs were asked to provide information about planned fieldings or upgrades to help determine the effect those plans will have on the current C4I infrastructure. The Office of the Deputy Chief of Staff, Information Management (ODCSIM), HQ USAREUR/7A, will review this information and grant permission for fielding and upgrading AISs as appropriate.

If USAREUR has an operational architecture in place to coincide with the fielding or upgrade, permission may be granted to field or upgrade the AIS. If, however, the ODCSIM determines that USAREUR cannot support an upgrade or fielding, the PM will be required to fund (in total) the upgrade or fielding, including costs for the required network or other architectural resources.

The ODCSIM has identified 33 command, control, and communications (C3) AISs planned for fielding in USAREUR over the next 5 years, and 158 new or legacy AISs that will be upgraded or replaced continually. Legacy AISs that are currently being used will be "grandfathered" until 1 October 2002. Until then, all upgrades must be coordinated with the ODCSIM to determine their effect on the infrastructure. After 1 October 2002, no legacy system will be replaced or upgraded until the following items are completed and approved by the ODCSIM:

➤An end-to-end operational architecture for AIS upgrades.

➤A C4 support plan. The plan will include at least the following information:

- Bandwidth requirements.
- Processing-power requirements (hardware upgrades).
- System-administration requirements.
- Database-management requirements.

➤A resource plan explaining what funds or resources the PM will provide to support the fielding (for example, hardware, communications devices, support personnel, maintenance).

These requirements also apply to USAREUR commands and HQ USAREUR/7A staff offices that have new AISs or are functional proponents for new AISs, including command-unique AISs (for example, local national pay systems, USAREUR-unique personnel systems), scheduled for

fielding in the USAREUR area of responsibility.

Functional proponents and recipients of upgraded or new systems must take the following actions:

➤Review the list of new and current legacy AISs posted on the ODCSIM Programs Branch Webpage at <http://www.aeaim.hqusareur.army.mil/programs/index.htm>, and provide any updates or additions to the ODCSIM POC provided on the webpage.

➤Notify the ODCSIM POC of any known legacy AISs in their functional area planned for upgrade or replacement before fiscal year 2003.

➤Involve the ODCSIM in the planning as soon as possible. The ODCSIM POC should be contacted as soon as a planned fielding or upgrade is known. The ODCSIM will help ensure that the system is compatible with the USAREUR modernization plan and included in the strategic operational architecture.

➤Notify the ODCSIM POC of any meetings or in-progress reviews being held to discuss future fieldings or upgrades. The ODCSIM POC will attend these meetings and ensure that the appropriate technical representatives from 5th Signal Command also attend.

➤Ensure PMs know USAREUR AIS policy, which will be published in USAREUR Supplement 1 to AR 25-1.

The POC is Mr. Miller, 370-7070.

PRIVACY ACT REPORT NO LONGER REQUIRED

The U.S. Congress has repealed the requirement for Government agencies to submit a Privacy Act Report every 2 years. If needed, the USAREUR Freedom of Information Act Officer can provide more information (370-8804).

REIMBURSEMENT FOR CANCELED LEAVE

The Fiscal Year 2001 National Defense Authorization Act amended Title 10, United States Code, to allow military personnel to be reimbursed for travel and related expenses incurred if their approved leave is canceled on short notice. To be eligible for reimbursement, the leave must have been canceled—

- Because of a contingency operation.
- Within 48 hours before the leave would have begun.

This new policy, which went into effect on 30 October 2000, does not apply to leave canceled because of normal temporary duty trips or field exercises.
